

### Premise

You are planning on going out in the super-early morning of Black Friday to go shopping. You have \$300 in cash that you've saved from work and odd jobs. You also have a credit card with a credit limit of \$500 at 19% APR. What would you buy? Where? Would you use cash or credit? Complete this matrix to answer these items.

Use this website to peruse Black Friday advertisements:

<http://www.theblackfriday.com/>

Remember that you may NOT spend more than you have but you also do Not have to spend all you have. Make sure you total the last column when complete.

Item?	Store?	Cash or Credit?	Amount?
